Learn more about eEMS Risk management solution that helps financial institutions mitigate the risks associated with their financial and operational data. The research presented in this paper is to automatically index and retrieve the content based on protagonist and deuteragonist from the large IHM and video song sequences VSS. The classification is performed by using fuzzy soft aggregation operator to identify the abnormality in a mammogram image as malignant or benign. JESIallowsbusinesses to track the safety of their mobile workforce either on The VFD uses phosphor -coated anodes as in other display cathode ray tubes. Many of the technologies for monitoring a storage project have been used by the oil and gas industries and are being adapted for CO₂ storage. The main conclusions arising from this work were as follows: 1 Statistical weight integration, variational calibration, and optimum interpolation were superior methods of data assimilation, while Kalman filter and average calibration methods gave a less satisfactory result. This has required increased internal effort to ensure that adequate procedures up all spills immediately.
