Lineament extraction was automatically done using the line tool in Geomatica software. Principle Aquifers Maps. We are thankful to the anonymous reviewers who have provided their valuable suggestions to improve the manuscript.

Middleandsouth,approximatelycoveredTheGeographicInformationSystem

The quality of water is related to the source whether it is improved or unimproved. The ground water potential is also high along river lines due to horizontal and vertical seepage of river water into the ground [12].

Theuserseesthewatersourcesrequiringattentioninbrightredonthemonit of the water quality in the areas not sampled was done using kriging method of interpolation found in the geostatistical tool in ArcGIS software. All the features like roads, railways, major water bodies, monitoring locations were extracted from the guide map.
