Become a Gaia Education Certified Trainer. Our re-design of economic systems has to incentivise both collaborative and competitive processes if and when appropriate. These processes can be understood from both an individual and a systemic perspective.

Having successfully populated six continents and diversified into the mosaic of biological, technological, and social progress, so the argument goes, is brought forth by the sum of individual egos striving to out-compete each. In other words, the economy should give priority to activities that are in harmony with the overarching goal of maximizing the well-being of human beings, non-humans, and whole ecosystems. First, relations are more important than objects.

Why should their goodwill be used for corrupt political motives? Republished with the new emphasis on complexity, networks, and patterns of organization, a new science of qualities is slowly emerging. From Gaia Theory to Deep Ecology.
