This project increasingly becomes a living demonstration in new models for approaches to forest management in Puerto Rico and the Caribbean. This trip was so great I can definitely say we will probably repeat it.

Many volunteers have changed the course of their studies or careers after exp They will also learn how they can have a positive impact through Citizen Science. The primary goals of the GRE were to map and characterize coral reef ecosystems, identify their current status and major threats, and examine factors that enhance their ability to survive—and recover from—major disturbance events. More info. Our guide was Neil Guerra. Published on Sep 20, Previous and current advisors and mentors: John P.
